

The use of this data is subject to the same [terms and conditions](#) as purchased data.

### Points

For any point on the map:

- Point descriptors for plot scale runoff rate estimation
- Rainfall rarity/depth data using the FEH22 or FEH13 DDF model (the legacy FEH99 data is *not* available for points)

### Sample point data

The following files are included in the sample data:

#### Point location

- Map screenshot illustrating point location

#### Point descriptors

Exports	FEH Software Compatibility	Incl FEH13 rainfall	Incl FEH22 rainfall	Incl BFIHOST19
<b>Primary:</b>				
Descriptors (XML)	ReFH2 (v3.3+)	✓	✓	✓
<b>Legacy:</b>				
Descriptors (XML legacy v4)	ReFH2 (v3.2)	✓	X	✓
Descriptors (XML legacy v2)	ReFH2 (v2)	✓	X	X

#### DDF Rainfall window

The following rainfall rarity/depth data using the FEH22 or FEH13 DDF model (the legacy FEH99 data is *not* available for points):

- Catchment Annual Maxima rainfall depths in CSV matrix at standard return periods and durations
- Rainfall growth curves (PNG)

*The above rainfall data can also be exported using the Peaks Over Threshold (POT) scale.*
